

ADAPTING TO 2020

Sharing good practice online

Mission

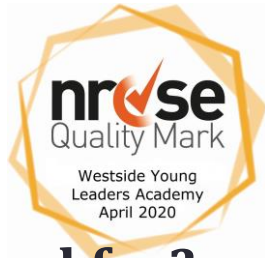

What do we stand for?

- NRCSE is committed to the support of effective, community-led, supplementary education that complements the learning of children and young people attending mainstream school.

And why?

- because every child has a right to an education that enables him or her to achieve to the very best of his/her abilities and to fulfill his/her aspirations

Mainstream schools cannot achieve this alone, now more than ever! We are here to support you.

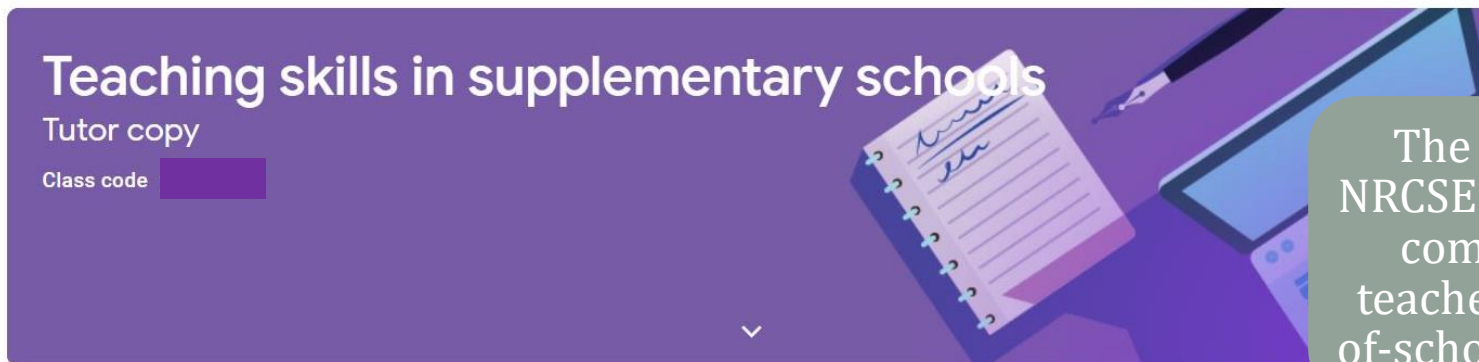

Supporting you to teach remotely

As part of this new approach to teaching NRCSE is supporting supplementary schools to offer:

- advice and guidance to parents on ways to encourage children's learning and growth
- signposting to helpful and appropriate websites
- tailored on-line resources and activities
- pre-recorded teaching sessions and downloadable resources
- live, online tuition through video conferencing platforms such as Zoom

Since April 2020, **184** teachers have taken part in our online training courses and 9 supplementary schools (including co-ordinators/MC members/staff) have taken part in our online Good Management course

Online teaching for supplementary schools: Sharing good practice

@JoeDale

Check out our summer
2020 webinars!

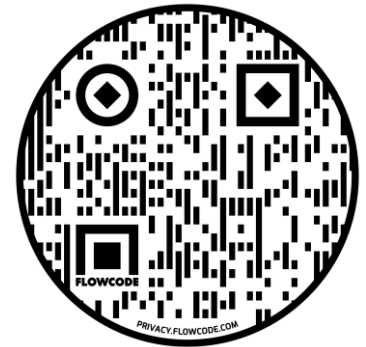

Session 1 outline:

- Advice on security features using videoconferencing tools such as Zoom including addressing safeguarding issues
- Using **Seesaw** to create activities and privately share multimedia content including screencasts and give written and audio feedback
- Using **Kahoot** to create multiple-choice exercises with embedded YouTube clips for remote listening and reading through gamification
- An overview of articles and resources around remote teaching highlighting the TiLT webinar series and where to find them
- Q&A

Remote teaching for supplementary schools: Integrating formative assessment into remote lessons.

@JoeDale

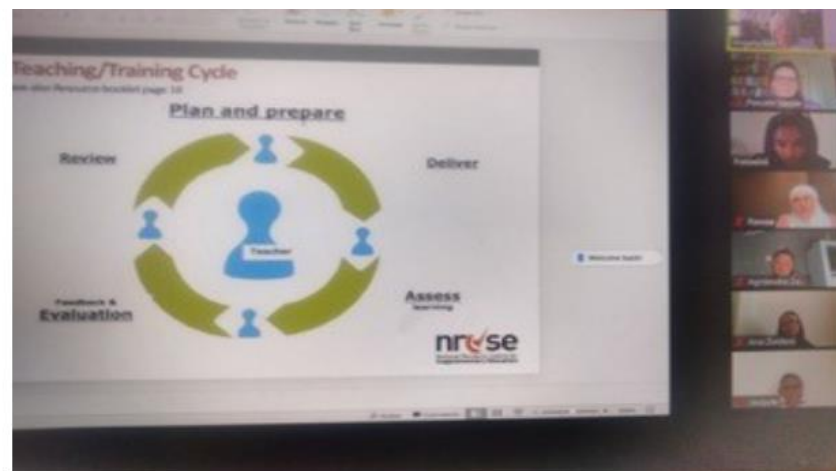

Check out our summer
2020 webinars!

Session 2 outline:

- **Mentimeter** to poll students' opinion and check in with them
- **Jamboard** to storyboard, brainstorm and co-create multimedia remotely
- **Screencasting** for creating presentations and giving video feedback with **Screencastify**, **Loom** and **Screencast-O-Matic**
- **Socrative** to create self-marking vocabulary tests
- **Quizizz** for a range of interactive activities including audio questions for remote listening through gamification
- **Google Forms** to make self-marking quizzes

Commission us to support your setting/s

- Each of our remote courses can be purchased for groups of 10-16 learners and delivered at times that suit you for £1,500.
- Includes expert online tuition, access to virtual Classroom with relevant research reports, templates, plans and e-booklets; additional one-to-one tutorial support to complete assignments; NRCSE certificates.
- If you would like to discuss content suitability for your setting/s email nrc@nrcse.org.uk or suzie@nrcse.org.uk for London.

'I found all aspects of the training very useful. The separate rooms in groups gave us a chance to discuss different ideas and strategies. We were able to discuss the video observations and compare ideas. The various hand-outs and PowerPoint slides were comprehensive and clear and I could compare my skills to the information provided. Angela delivered the course very clearly and found all the information she provided useful in all aspects.'
